

# New Ford RANGER 4WD System

Driver-selectable four-wheel drive (4WD) system for outstanding traction on tough terrain

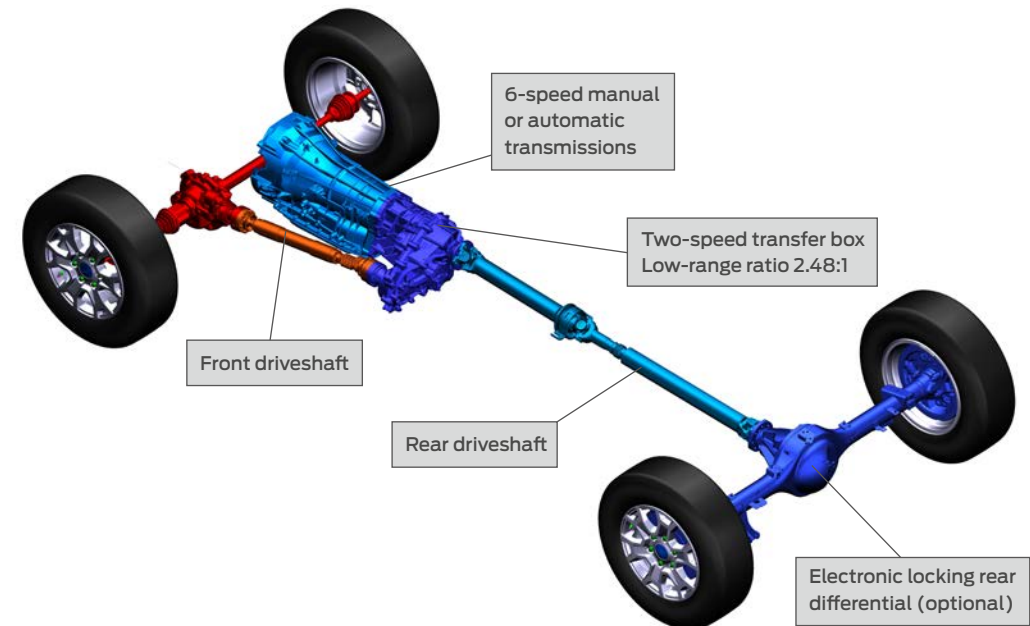

Electronically-controlled transfer box delivers three drive modes:

- Rear-wheel drive (2H)
- Four-wheel drive high-range (4H)
- Four-wheel drive low-range (4L)

**Low-range 4WD** provides additional low-speed torque or downhill engine-braking for extreme off-road conditions

Off-road capability is enhanced by standard **Electronic Stability Control (ESC)** with **Traction Control, Hill Descent Control** and **Hill Launch Assist**

Optional **electronic locking rear differential** improves traction in challenging terrain

## Shift-on-the-Fly

Electronic Shift-on-the-Fly allows the driver to shift between 2WD and 4WD high-range at speeds up to 120 km/h (75 mph)
