

PRESS RELEASE**Cad-Q and Datacubist sign OEM-agreement* and start cooperation within technology development**

Cad-Q and Datacubist have signed an agreement today providing Cad-Q the opportunity to include simplebim® in the Naviate® product family as Naviate Simple BIM.

The goal is to develop a cooperation that will result in positive technical solutions supporting the BIM-processes in the building industry. An OEM-version of simplebim will ensure a seamless integration of the product with Cad-Qs solutions including Autodesk Revit with Naviate Architecture, Structure, Electrical and HVAC & Plumbing.

Cad-Q continue to invest in integration with other leading technology such as the implementation of collaboration format BCF in cooperation with Solibri, the launch of Naviate IFC-export and latest the integration of the technology from Datacubist.

Naviate Simple BIM will be further developed to support relevant and reliable information flow from one design tool to cooperating design or analysis tools. Naviate Simple BIM will be able to provide a solution that helps meet BIM requirements and automate the refined flow of IFC data into local expert applications. With this technology we can provide a quality ensured OpenBIM workflow in any project.

■ ■ **Cad-Quality AB (Cad-Q)** is the Nordic region's leading supplier of IT systems for design and CAD development. The solutions build on experience of the customers' industries in combination with practical knowledge of the developers' need for IT support. The offering includes the development of processes and work methodology as well as implementation and support of primarily CAD-related systems. Our customers are active in the manufacturing industry, building and facilities industry, property management and the public sector. Cad-Q companies were founded in 1989 and have about 230 employees at 20 offices in Sweden, Norway, Finland and Denmark. Cad-Q is part of Addnode Group, which is listed on the OMX Nordic List, Small Cap. Read more on www.cad-q.com

■ ■ **Datacubist Oy** is a globally operating, privately owned software company registered in Finland. The goal of the company is to solve data exchange problems in the building industry by creating solutions that address the business, process and technology aspects of using BIM in real projects. Read more on www.datacubist.com

simplebim® is a BIM editor that gives you the simple, yet sophisticated tools you need for putting a BIM into shape for professional quality data exchange.

Naviate® is a Nordic product portfolio from Cad-Q with solutions for Autodesk products Inventor, Revit and Civil 3D.

Autodesk® Revit® software is specifically built for Building Information Modeling (BIM), helping building professionals design, build, and maintain higher-quality, more energy-efficient buildings. Autodesk Revit is now available as an application that combines the capabilities of Autodesk® Revit® Architecture, Autodesk® Revit® MEP, and Autodesk® Revit® Structure software.

**An OEM-agreement gives a company who has a relationship with the original manufacture rights to resell that manufacturer's product under its own name and branding.*
