

Can you achieve complete process automation with Robotic Process Automation (RPA)?

Achieve complete process automation with Robotic Process Automation (RPA). RPA offers a quick, reliable and cost effective solution to automate high volume, low value processes. [Join us for Breakfast](#) on Thursday 7th December between 8.00 and 11.00 am to find out how.

Why you should attend:

- To explore if Robotic Process Automation is the right technology for you.
- Understand with examples and live demos how RPA can work in conjunction with traditional automation technologies and help achieve complete automation.
- Find out what challenges you might face while implementing RPA and what are the best practices.
- Look at live demos and participate in a short exercise to identify tasks within your organisation that are most suited for RPA.

“What sets Spotcap apart from a typical credit provider is the efficient way we can turn around a loan offer, and the robotic process automation capabilities that Kapow delivers are key to enabling our quick and efficient service.” Karl Sponholz, COO of Spotcap.

[Join us](#) at the ArcelorMittal Orbit on 7 December and decide at the end how you'll get down from the tower:

- 455 steps? (the manual option)
- The lift? (traditional automation)
- Can you achieve complete process automation with Robotic Process Automation (RPA)?
