AIS CLASS A/B

The industry's most comprehensive line up of AIS receivers and Class A and B transponders to suit every application. Opt for the great value AIS100 to bring an AIS overlay to your traditional plotter or opt for iPad integration with our award winning iAIS receiver. The ANT200 and uAIS encapsulate all the AIS technology in a smart antenna and our AIT2000 Class B transponder provides exceptional connectivity with NMEA 0183, NMEA 2000 and USB connections. Use the SPL2000 to share your VHF antenna with VHF, AIS and FM radio.

SENSORS & NAVIGATION

Our DualNav technology utilises GPS and GLONASS satellite navigation systems for exceptional reliability and accuracy and features a programmable NMEA output to allow interfacing with legacy and next generation systems. The HSC100 compass sensors provide high speed heading data for Class A AIS systems, plotters and radars.

NMEA TO WIFI

Integrate your boat's electronics via NMEA 0183 and NMEA 2000 to the latest range of mobile devices such as PCs, MACs, iPads and Tablets. These NMEA to WiFi servers create a wifi hotspot on board so you can use the latest apps and programs to view your on board data.

ABOUT DIGITAL YACHT

Digital Yacht is all about next generation navigation, communication and entertainment systems for your boat. Boating should be fun, safe and easy and our products integrate into existing and new boat networks to bring a powerful dimension to your on-board electronics.

We firmly believe that low cost consumer devices such as iPhones and tablets, PCs and MACs have a place on board and can help make legacy systems compete with the latest in dedicated marine electronic products at a fraction of the cost. We make internet access whilst afloat easy and affordable as well as bringing all your navigation data to your favourite consumer devices – not just for you but for crew and guests too.

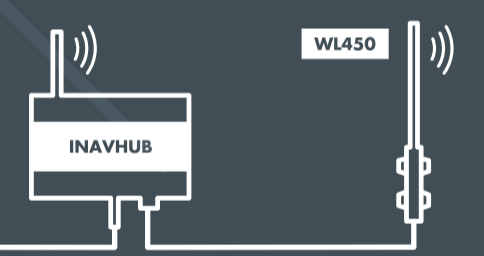

Our navigation systems cover advanced GPS and compass technology as well as the most comprehensive range of AIS products in the marketplace. Plus our PC and software solutions bring simple yet powerful solutions to a variety of on board requirements from communication to navigation, entertainment to monitoring.

Our design team has 100's years combined experience in marine electronic systems and we take pride in our quality heritage with manufacturing in the UK and global reach with offices in the US and China. Last year our products were sold in over 100 countries worldwide.

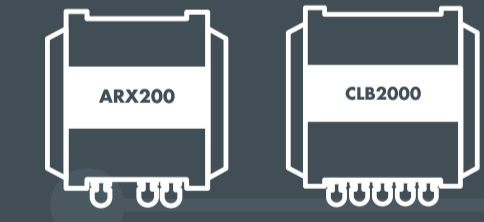

SAFETY

Our products use the latest concepts to improve maritime safety. AIS LifeGuard acts as an AIS SART alarm instantly alerting users to an active AIS SART – ideal for use with MOB systems or utilise our S1000 Smart AIS SART for IMO approved requirements.

WIRELESS INTERNET

Access the internet whilst afloat via local wifi hotspots. Our WL series products offer easy USB and network connectivity with ranges up to 5-6NM. Share your internet connection with our range of routers and wifi hubs which can also distribute NMEA data. Step on board and you're connected!

MARINE PCs

Digital Yacht's AQUA PC range offers ultra-low DC power consumption, powerful processing and exceptional reliability with fanless and solid state operation. Make the PC the hub for on board navigation, communication and entertainment and integrate via the built in NMEA interfaces with traditional marine electronic products. Digital Yacht – next generation navigation solutions.

DIGITAL DEEP SEA

Marine electronic products for naval, commercial, workboat and fishing users. Tough, type approved products including AIS SARTs, Class A transponders and wireless interfaces for professional users – Digital Deep Sea is the professionals choice.

SOFTWARE

BOATRANET AND ONBOARD CONTROL

E-Enable your boat with BoatraNet, a wireless server for navigation data as well as documents, handbooks, music, video and photos. Any Smart Phone or Tablet with a built in browser can view the data making it ideal for captains, crew and friends. iVLink also represents next generation boat control with wireless switching of up to 8 DC circuits direct from your iPhone or Tablet.

INTEGRATION WITH THIRD PARTY PRODUCTS

INTEGRATION

Digital Yacht products are designed to be symbiotic with other equipment. We integrate via NMEA, NMEA 2000, USB, ethernet and WiFi technologies for the most flexible installation solutions available today.
