Operating Indicators for January 2020

Update on indicators for first half of February

SINGAPORE, 25 February 2020 – Singapore Changi Airport handled 5.95 million passenger movements in January 2020, an increase of 5.2% compared to the same period last year. Aircraft movements rose by 2.2% to 33,400 landings and takeoffs, while airfreight throughput declined 8.4% to 157,000 tonnes for the month.

Passenger movements for the month of January saw growth in all regions. This was contributed by travel around the Chinese New Year which was on 25 January this year, compared to 5 February in 2019. However, air travel demand began to be impacted as the Coronavirus disease 2019 (Covid-19) situation worsened in China and the rest of the region.

For the first two weeks of February, total passenger movements at Changi Airport decreased by more than 25%, while traffic between Singapore and China declined by more than 85% year on year. The impact was amplified by the Lunar New Year travel peak which occurred in February last year.

As of 14 February, there were about 40 weekly services to less than 10 cities in mainland China, a decrease of 90% from around 400 weekly services linking Singapore to 36 Chinese destinations previously.

Changi Airport's traffic statistics are available at:
