PWR/DATA

Sonar Server

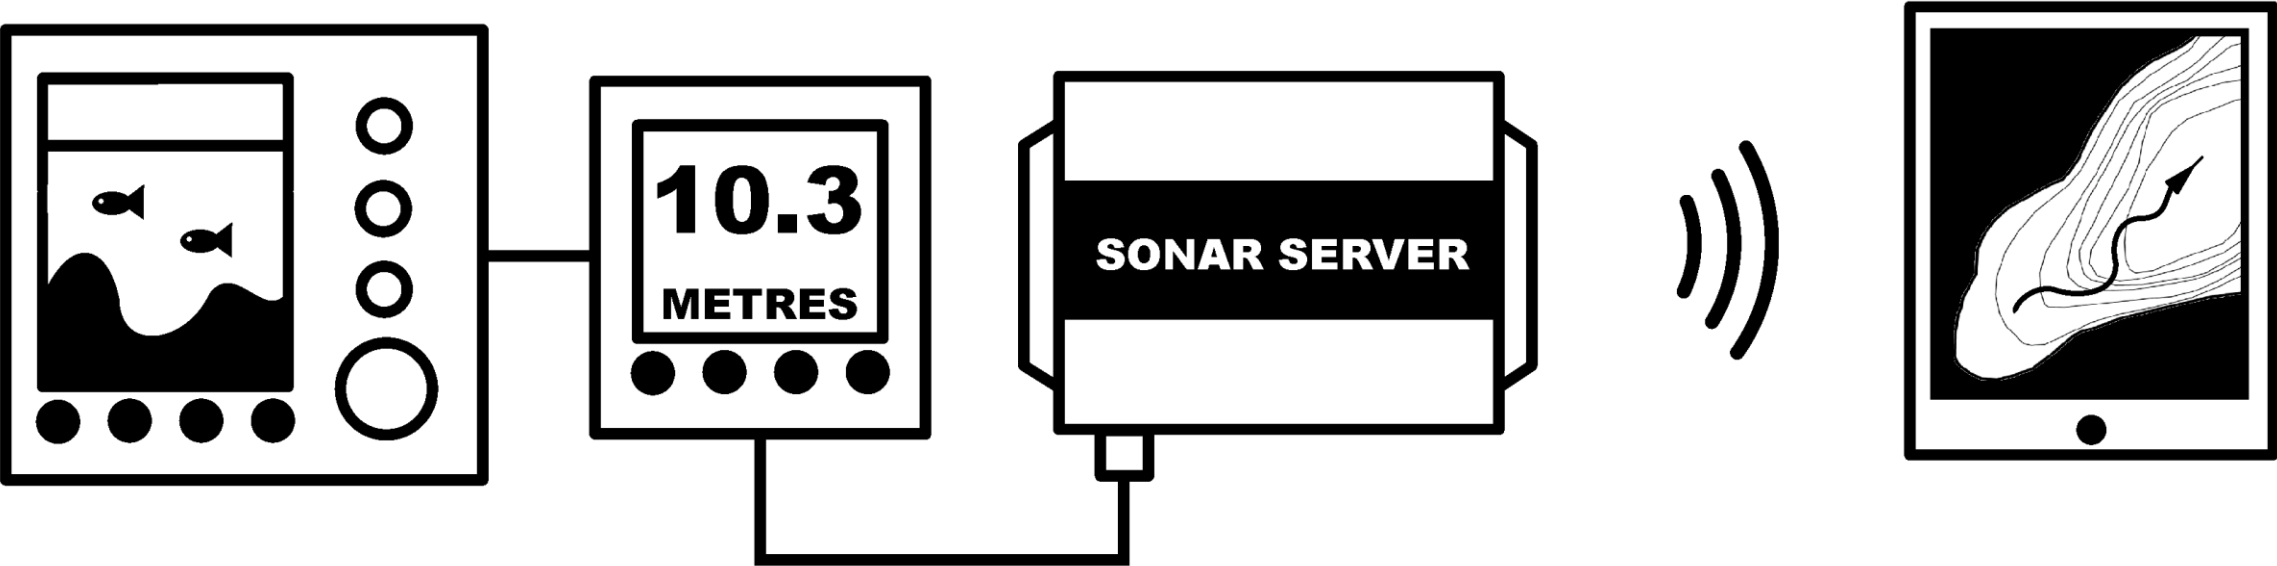

SonarCharts Live

- Sends live depth data from the boat's system to the Navionics App allowing real time drawing of bathymetry
- Simple wifi connection
- No need to install other transducers or systems – works with any NMEA capable depth instrument, sounder or fish finder

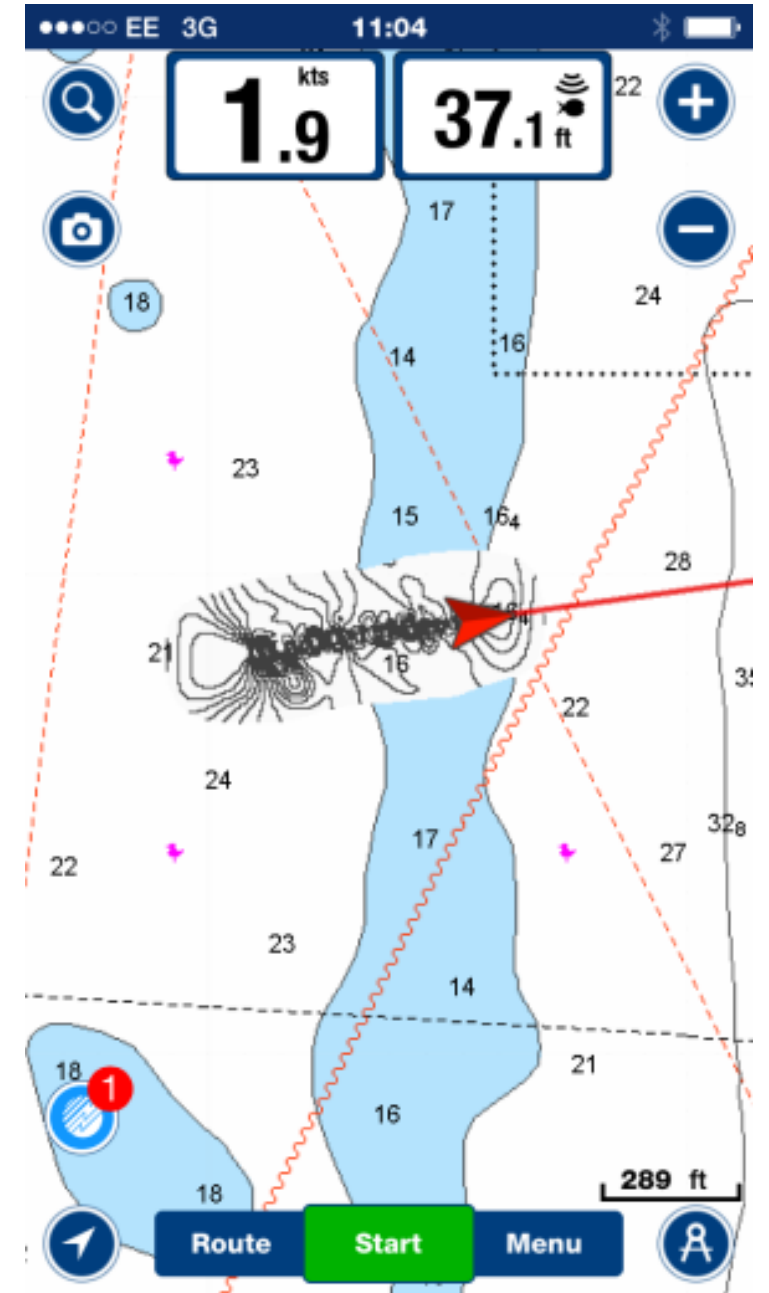

Sonar Server

Easy 2 wire NMEA installation

Sonar Server Plus GPS Data Too...

- GPS position data also sent if available allowing Boating App to be used on non GPS tablets
- Improves accuracy, saves battery life and allows tablet operation below decks where internal GPS could be shielded

Sonar Server
