CAE-Forum Stage

As a crystallization core, the CAE-Forum is already bringing together the topics of the leading Digital Factory trade fair for the fifth time. With a joint stand, hall 006 on the CAE-Forum will provide an exhibition with presentations from industry and research.

Current topic highlights:

Numerical simulation, 3D visualization (AR / VR), additive manufacturing, digital twin, agile product development and sustainable product development.

A sophisticated forum program with more than 60 presentations and discussion sessions which will be offered on all five exhibition days.

Support the **companies, industry and software-independent exchanges** and position your company brand in the CAE-Forum environment.
