

UK fuel prices report

Petrol and diesel price changes in September 2017

Our view on prices

“There is scope for a further round of pump price reductions as wholesale unleaded is 6p a litre cheaper than it was at the start of September.

“If the big retailers were to play fair with motorists we would see at least another 2p a litre come off unleaded at the pump. Unfortunately, the wholesale price of diesel is static so we won't be seeing any cuts there.

“With oil up to its highest price since early July 2015 motorists have been saved from steeper prices by the pound which has gained in strength. Without this drivers would be paying far more for their fuel. The late September petrol and diesel cut from the supermarkets was a demonstration of how important a favourable exchange rate is .”

— Simon Williams, RAC fuel spokesman

Crude oil

Price of a barrel of oil **rose**
\$5.40 to \$58.48

Unleaded

Wholesale price **fell 6p** to
110.1p per litre
Pump price **rose 0.83p** to
119.19p per litre

Diesel

Wholesale price **rose 0.72p** to
115.73p per litre
Pump price **rose 1.34p** to
120.31p per litre

Two week pump price predictor from 1 October 2017

↘ Unleaded — price falls expected

→ Diesel — little change expected
